

MEI Appoints ECS as Service Contractor

October 2003

MEI has announced the appointment of ECS (Electromech ECS Limited) as its service contractor in the UK for its MEI Sodeco™ BNA series of banknote validators, which are extensively used in transport and parking ticket vending machines.

Welcoming the deal, Chris Bristow, MEI UK Sales Manager for transport, parking and retail, said: “We are delighted to have reached agreement with ECS to provide service for our range of banknote validators. The company has an excellent reputation, and we are confident that it will provide a level of service which matches the high standards of MEI.

“Our validators are used in the majority of parking and ticket vending machines in the UK. They offer very high levels of reliability, but on the occasions when there are problems it is important to operators that they are dealt with swiftly and efficiently.”

MEI is one of the world’s leading manufacturers of payment systems, and its systems are used for some one billion transactions per week in 90 countries worldwide. Its products are used in vending, pay telephones, gaming, retail, amusements, lotteries and the transport industry. The MEI Sodeco™ BNA series of banknote validators is widely acknowledged as being the most reliable and secure on the market.

Robert Cottingham, Sales Manager for ECS said: “As a company we are committed to working closely with leading businesses in each of the sectors we operate in. MEI has an enviable reputation both in the UK and globally, and we are very pleased to have been appointed as their sole service contractor in the UK.”

Founded in 1989, ECS specialises in repairing electromechanical and electronic equipment. The company aims to be the preferred choice for customers in each of its main markets, by offering superior quality, service and value.
